PROCESS FLOW

OUR PROCESS

Workflow

Our Process flowchart

STEP 01

Analysis

First level of process is to get to know the complete specification about the project requirement.

STEP 02

Brainstorming

For a quality product we need to spend quality time during brainstorming session. We both get your requirements and share our ideas and suggestions

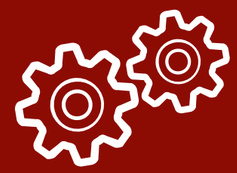

STEP 03

Prototyping

We develop the complete mock-up as per the requirement in this stage and give it for review and revisions.

STEP 04

Development

Approved Mock-ups will be developed as a beta product during this phase exactly as per the requirements.

STEP 05

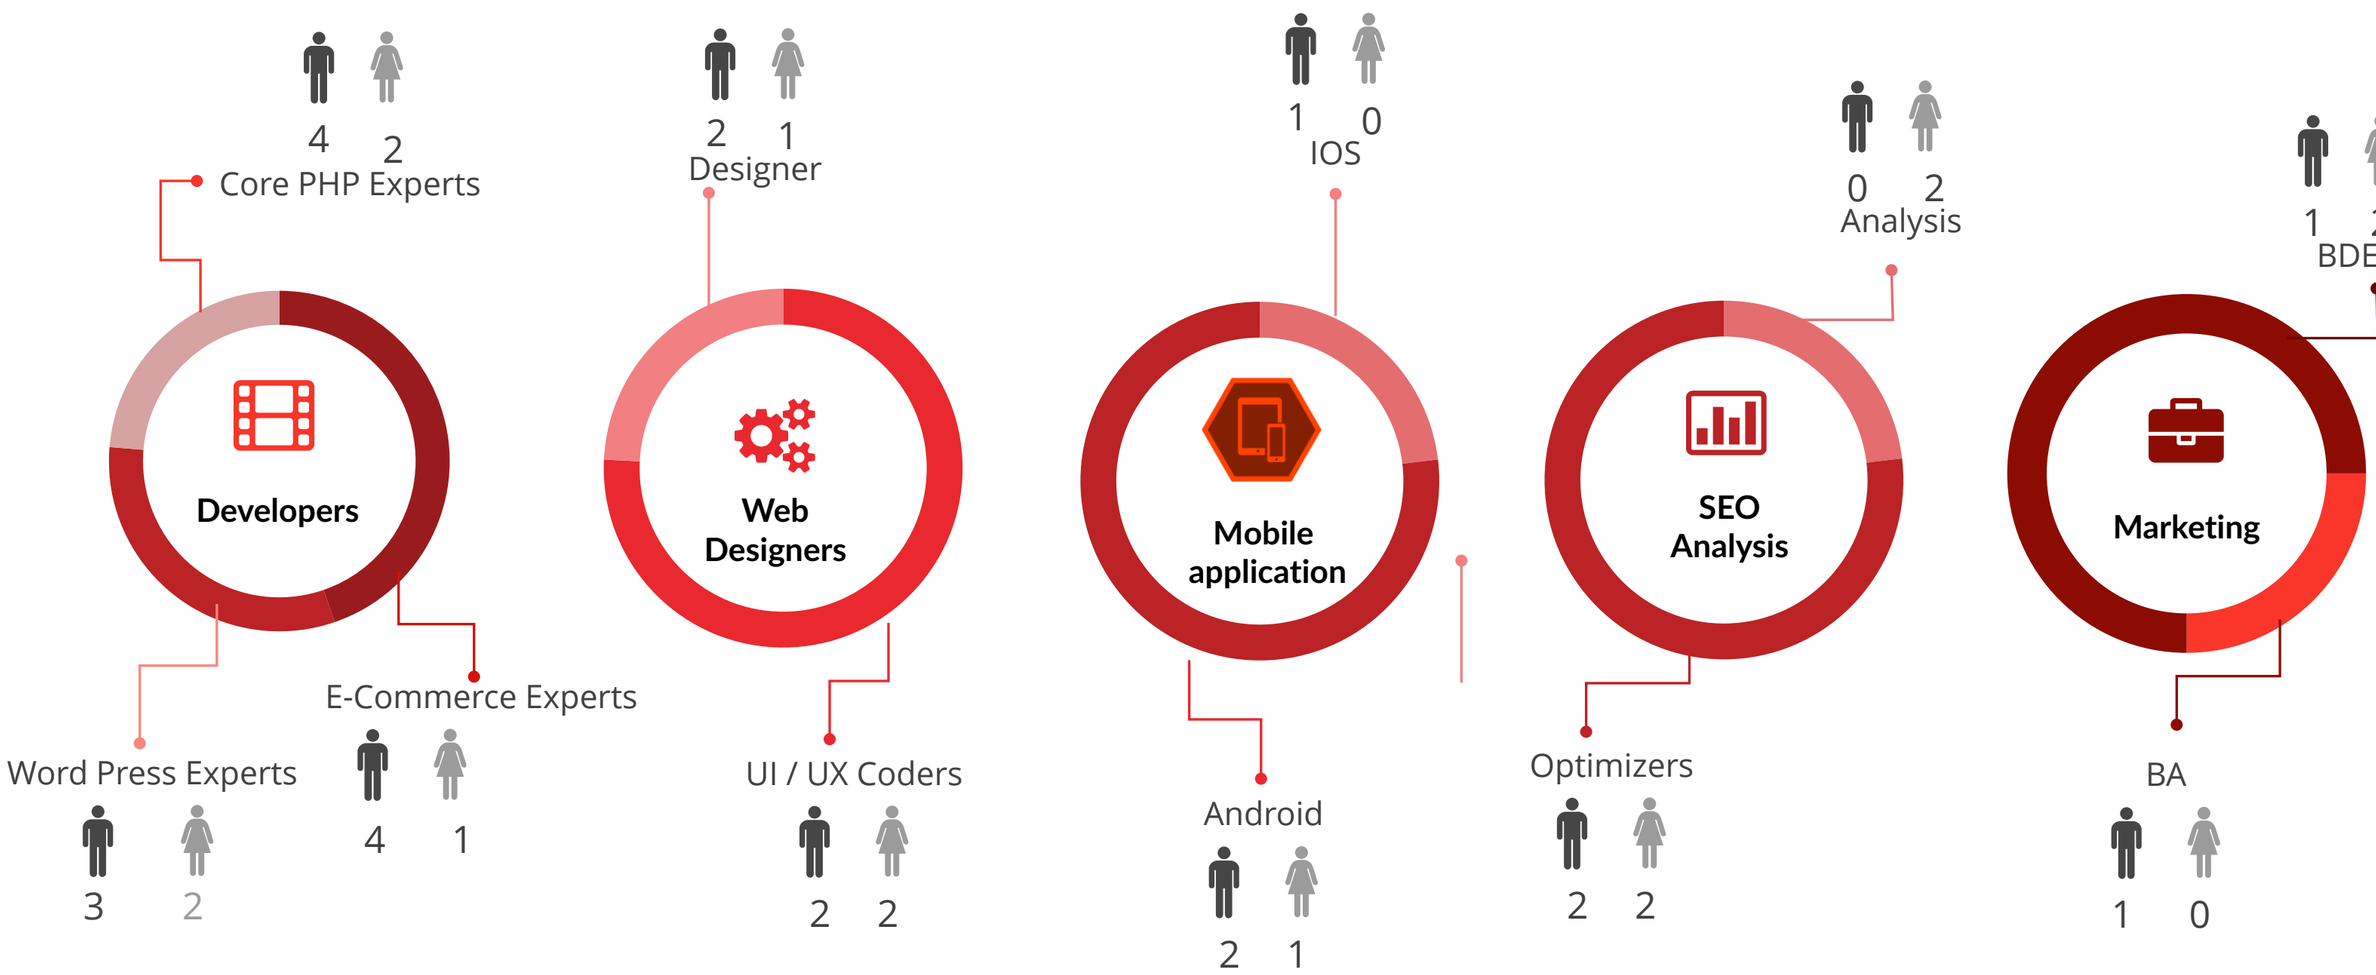

End Products

After review, revisions and UAT the final product will be delivered.
